Necron Rules

Annihilation Protocols

Only a single unit with Annihilation Protocol may be taken in armies using the Nodal Command Force Organisation Chart that contains any Fortifications.

Awakening Protocols (Tier)

This rule is accompanied by a tier of Bronze, Silver, Gold, and Platinum. Units with this rule can only be included in lists which contain an HQ model with the corresponding **Nodal Command** tier or higher. Some units have both of these special rules, in which case they cannot satisfy this rules requirements with their own **Nodal Command** special rule.

Command Protocols

At the start of the game, after both sides have deployed, each unit with this ability may select a Command Protocol that can be used during the game. Many options allow the player to roll a **Command Protocol check** for additional benefits. To do so, roll a Leadership Check, with success granting the listed effects. Failure causes the listed negative effect immediately.

Protocol of Eternal Guardian

This model may give up their Shooting Attacks this turn to use this power during the Movement Phase. Select a single friendly Necron unit within **Nodal Range** that has not moved yet and apply one of the following affects to the unit:

- The chosen unit gains a 5+ Cover Save, but may not Run, until your next turn
-

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed,

Protocol of Sudden Storm

This model may give up their Shooting Attacks this turn to use this power during the Movement Phase. Select a single friendly Necron unit within **Nodal Range** that has not moved yet and apply one of the following affects to the unit:

- The chosen unit may immediately move a number of inches up to twice its unmodified Initiative Characteristic. If the chosen unit has mixed Initiative Characteristics, use the highest unmodified Characteristics.
- The chosen unit ignores Difficult and Dangerous Terrain alongside negative modifiers to their movement until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit may only move half their Movement (rounded down) this turn.

Protocol of Vengeful Stars

This model may give up their Shooting Attacks this turn to use this power during the Shooting Phase. Select a single friendly Necron unit within **Nodal Range** that has not shot yet and apply one of the following affects to the unit:

- The chosen unit's Ranged Weapons gain the Ignores Cover rule until your next turn.
- The chosen unit's Ranged Weapons gain Breaching (6+) or increase the level of Breaching or Rending by 1 until your next turn.
- The chosen unit gains Relentless until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit suffers -1 BS this turn.

Protocol of the Hungry Void

This model may give up their Shooting Attacks this turn to use this power during the Shooting Phase. Select a single friendly Necron unit within **Nodal Range** apply one of the following affects to the unit:

- The chosen unit gains the Counter Charge (1) special rule until your next turn.
- The chosen unit's Melee Weapons gain Breaching (6+) or increase the level of Breaching or Rending by 1 until your next turn.
- The chosen unit gains the Furious Charge (1) special rule until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit suffers -1 WS this turn.

Protocol of the Undying Legions

This model may give up their Shooting Attacks this turn to use this power during the Shooting Phase. Select a single friendly Necron unit within **Nodal Range** and apply one of the following affects to the unit:

- The chosen unit can re-roll results of 1 once for **Reanimation Protocols** until next turn. Dynastic Warriors can re-rolls results of 1-2.
- The chosen unit's **Living Metal** ability has its It Will Not Die level increased by 2 levels (e.g. 5+ -> 3+) until your next turn.

• You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit suffers -1 to *Reanimation Protocol* rolls until next turn.

Protocol of the Conquering Tyrant

This model may give up their Shooting Attacks this turn to use this power during the Movement Phase. Select a single friendly Necron unit within **Nodal Range** and apply one of the following affects to the unit:

- The chosen unit counts as being in **Nodal Range** of all units with the **Command Protocols** special ability until your next turn.
- The chosen unit gains the Hit & Run ability until your next turn.

• You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit gains the Soulless Hordes (Bronze) trait this turn, if it did not already have it, and cannot ignore the Engrammatic Attack Patterns provision this turn.

Nodal Command (Tier)

This rule is accompanied by a tier of Bronze, Silver, Gold, and Platinum. Each tier provides a specified range known as Nodal Range, which many other abilities reference for their effects. Any unit within Nodal Range of this unit may use its Leadership in place of its own and units with the **Soulless Hordes** sub-type may ignore the Engrammatic Attack Patterns provision. The highest tier unit in your army *must* be your Warlord.

Tier	Nodal Range
Bronze	6"
Silver	9"
Gold	12"
Platinum	12"

Entropic Strike (X)

When allocating wounds from a Wound Pool from a weapon with this special rule, lower the target model's Armour Save by 1 (e.g. 3+ -> 4+) permanently before making its save. Against Vehicles, an Armour Penetration roll equal to or greater than the listed value lowers the AV of all facings by 1 permanently before resolving the effects. Vehicles with lowered to an AV of 0 are destroyed and removed from the battlefield.

Exile Ray (X)

When firing a weapon with this special rule, a To Wound roll equal to or higher than the value listed wounds automatically, regardless of the target's Toughness, has the Instant Death special rule, and the victim must re-roll successful Invulnerable saves. Against Vehicles and Buildings, an Armour Penetration roll equal to or higher than the listed value inflicts a Penetrating Hit.

Gauss (X)

When firing a weapon with this special rule, a To Wound roll equal to or higher than the value listed wounds automatically, regardless of the target's Toughness. Against vehicles and buildings, an Armour Penetration roll equal to or higher than the value listed inflicts a Glancing hit. Super Heavy and Gargantuan Creatures are immune to this effect.

Hyperspace Hunters

A unit with this rule specializes in combat make use of movement through hyperspace pocket dimensions. In your Movement Phase, this unit may slip back into hyperspace instead of moving, as long as it did not arrive from Reserves this turn and is not locked in combat or Falling Back. If it does so, remove it from the board and place it into Ongoing Reserves. Models with this rule still make It Will Not Die rolls while placed back into reserves.

Living Metal

Infantry and Vehicles with this rule have **It Will Not Die (5+)**. Successful Wounds inflicted by attacks with the Poisoned or Fleshbane special rules must be re-rolled. The Shock Pulse and Disruption special rules affect models with Living Metal as well. Leadership penalties caused by the Anethema sub-type are ignored.

Vehicles ignore the effects of Crew Shaken (but still lose a Hull Point). If the vehicle is Heavy or Super-Heavy, they are not subject to the particular effects of the Lance and Melta special rules by attacks made against it. In addition, it reduces the effects of all rolls on the Vehicle Damage chart caused by Penetrating hits (other than by Destroyer type weaponry) by -1.

Decurion/Tesseracterion Nemessor

The Decurion Nemessor / Tesseracterion Nemessor special rule grants the following benefits:

- Rites of War: If a Detachment with the Necron Faction includes at least one model with the Decurion Nemessor special rule then that Detachment may select a single Rite of War.
- Lord of the Legion: An army may only include a maximum of one model with this special rule per 1,000 points. This counts across all Detachments of an army.
- A model with this special rule may also include an Immortals, Pariah Lychguard, or Royal Lychguard unit as part of the same Force Organisation slot as the model with the Decurion Nemessor special rule, but must still meet the required **Awakening Protocols** tier.

If multiple units are eligible to take this ability, it can only be taken by those with the highest Nodal Command tier in the force that has not already taken this ability.

Reanimation Protocols

Whenever a unit with Reanimation Protocols would suffer wounds, after the opponent's unit's attacks or the effects have been resolved and models have been removed total the number of wounds that have been lost among models that were destroyed, the unit begins **reassembling** a number of wounds equal to this amount. For each wound that is being reassembled, roll a d6, subtracting one for wounds with Instant Death. This unit **reanimates** a wound for every 5+ roll. Each time such a unit reanimates a wound:

- If that unit is less than its Starting Strength, return one destroyed model to play in cohesion range with one wound remaining.
- Then, if that unit is at its Starting Strength and has models that are missing any wounds, one of the models with the least wounds regains a wound. Controlling player decides in case of ties.

When assigning wounds to units that have multiple models missing any wounds, assign them to the models with the lowest amount of wounds. In case of ties, the attacking player decides which models to apply them to.

Soulless Hordes (X)

Models with the Soulless Hordes subtype are subject to the Engrammatic Attack Patterns provision, which has effects dependent on the tier of the subtype:

Bronze: During the controlling player's Shooting phase and Charge sub-phase, the Soulless Hordes unit must attempt a Shooting Attack if there is an enemy unit within range (they are not forced to charge), and must target the closest enemy unit possible that is within its line of sight and a valid target for a Shooting Attack or Charge. If two or more targets are equally close then the controlling player chooses which will be the target of a Shooting Attack or Charge. Similar to the Fearless rule, this unit cannot choose to fail a Morale check due to the Our Weapons Are Useless special rule. Additionally, they may not make Reactions.

Silver: During the controlling player's Shooting phase and Charge sub-phase, *if* the unit attempts a Shooting Attack and/or Charge they must target the closest enemy unit possible that is within its line of sight and a valid target for a Shooting Attack or Charge. If two or more targets are equally close then the controlling player chooses which will be the target of a Shooting Attack or Charge. Similar to the Fearless rule, units with this subtype cannot use any Reactions that grant a Cover Save, Armour Save or Invulnerable Save, and cannot choose to fail a Morale check due to the Our Weapons Are Useless special rule.

The **Command Protocols** trait is able to suppress this sub-type's effects while in Nodal Range.

Teleporation Reserves

Tesla (X)

When firing a weapon with this special rule, a To Hit roll equal to or higher than the value listed generates an additional 2 hits. These hits may be applied to the target unit, or to any unit within 2" of the target unit.

Tomb Guardians

Only a single unit with the Tomb Guardians rule may be used in any army which is built using the Nodal Command Force Organisation Chart and does not contain any Fortifications, should the army contain Fortifications there is no limit.

Bloodswarm Scarabs

Friendly units of Flayed Ones and Flayer Kings can re-roll the scatter dice when arriving from Deep Strike Reserve.

Dispersion Shield

Grants a 3+ Invulnerable Save, but the wielder never receives +1 Attack for fighting with two Melee weapons.

Gloom Prism

This model gains the Anathema sub-type. Additionally, any psychic power targeting a unit within 3" of this model is nullified on a 4+.

Mindshackle Scarabs

At the start of the Fight sub-phase, select a model in base contact with the bearer. The target must take a Leadership Check on 3D6. If the Check is failed, the victim strikes at his allies instead of attacking normally. During the Fight sub-phase, the target makes his attacks against his own unit (automatically hitting if they are the only model in the unit), resolved as normal with any abilities and penalties from his weapons (the controller of the Mindshackle Scarbs chooses which, if there is a choice). If the target is still alive, the victim returns to normal once all blows in that round of combat have been struck.

Phylactery

Increase the models It Will Not Die level to 3+.

Phase Shifter

Grants a 4+ Invulnerable Save.

Shadow Ankh

The bearer gains the Anathema sub-type.

Resurrection Orb

Once per battle, on your turn, the bearer can activate their Resurrection Orb. If it does, select one friendly unit with **Reanimation Protocols** within **Nodal Range**. The bearer of the Orb and the selected unit immediately **reassembles** a number of wounds equal to the total number of missing wounds and number of wounds from all destroyed models.

Semipternal Weave

Increase the model's save to 2+.

Sepulchral Scarabs

Increase this model's It Will Not Die level to 3+.

Tesseract Labyrinth

One use only.

The bearer can use the Tesseract Labyrinth in lieu of making a Shooting or Close Combat attack this round. Choose a unit within 6". The unit must immediately roll a Wounds Check for each model based on their current remaining wounds or be trapped within the Labyrinth while the Necron Character remains alive.

This can also be used to carry a unit alongside the bearer. Select a unit to start the game inside the Tesseract Labyrinth. They can be disembarked as if they were in a Transport with no Special Abilities following the relevant rules.

If paired with the **Mindshackle Scarabs** wargear, this can also be a unit chosen from an enemy faction. The unit is treated as a Distrusted Ally and still take up a relevant Force Org Slot. In narrative games, units that are captured at the end of the game can be included as well. Leave it your opponents as to whether it includes a Force Org Slot or points.

Translocation Shroud

The bearer's unit gains the Fleet (2) special rule. When moving, the bearer's unit can move over all other models and terrain as if they were open ground. However, they cannot end their move on top of other models and can only end their move on top of impassable terrain if it is possible to actually place the models on top of it.

Quantum Shielding

A vehicle equipped with active quantum shielding counts all of its Front and Side Armour Values as 13. A vehicle's quantum shielding is active until it suffers a penetrating hit, at which point it immediately deactivates. For the remainder of the battle after a vehicle's quantum shielding deactivates, all subsequent hits against that vehicle (including hits made from subsequent shooting attacks in the same phase – either from a different weapon or a different unit – or hits made at a lower Initiative step in close combat) are treated as though the vehicle was not equipped with quantum shielding.

Quantum Orb _____ X pts

Once per battle, at the start of your turn, the bearer can activate this item. If it does, select one point on the battlefield anywhere within 24" of the bearer and place a marker at that point. At the start of your next turn, resolve a S8 AP 3 Large Blast hit directly on that location.

Withering Worldscape

Whilst the C'tan Shard is on the battlefield, all Difficult terrain is Dangerous for the enemy. If the terrain is already Dangerous, the Dangerous Terrain test is failed on a 1 or a 2.

Specialist Powers

Gaze of Death

In its Shooting phase, in addition to using Powers of the C'tan, this model can target one non-vehicle enemy unit within 12" to which it has line of sight. The unit suffers a number of Wounds, dependent on the level of the C'Tan. Shard level causes wounds equal to 3D6 minus the target's Leadership while Transcendent causes 4D6. These are resolved at AP2 and with the Ignores Cover special rule. If at least one unsaved Wound is inflicted, the C'tan Shard of the Nightbringer immediately regains one Wound lost earlier in the battle.

Lord of Fire (X)

All Flamer weapons (as well as Heat Rays, Burnas, Skorchas, Inferno Cannons and any other weapons which is described as using 'flame' or 'fire' as its effect or in its special rules) and weapons with the melta type fired within 12" of the C'tan Shard have a chance of exploding. Roll a D6 each time such a weapon is fired within range. On a roll equal or greater to this power's level, the weapon detonates. If carried by a non-vehicle model, the model is removed from play as a casualty with no saves. If mounted on a vehicle, it counts as Weapon Destroyed and causes the lose of a Hull Point. In either case, the shot(s) misfire and are lost.

Shard: Lord of Fire (6+)

Transcendent: Lord of Fire (5+)

Gaze of the Abyss

If this model would be targeted by a Shooting Attack or Charge, the attacking unit must immediately make a Morale Test. Additionally, the C'Tan has the Fear ability at a level dependent on its level.

Shard: Fear (2)

Transcendent: Fear (3)

Grand Illusion

After all forces have been deployed and all Scout moves have been made, roll a dice dependent on the C'Tan's level, being a D3 for Shard and D6 for Transcendent. You can immediately redeploy this many units, subject to the normal deployment rules for the mission. This power can be used to move units into or out of, reserve.

Voltaic Storm

After this model has completed its movement, target an enemy Vehicle, Dreadnought, or Automata unit within 18" with this power. Roll a D6 to determine the effect, dependent on the C'Tan's level.

D6	Result
1	No Effect
4-5	A Vehicle Unit Type that is part of the target unit suffers 1 Penetrating Hit if Shard Level, or 2 if Transcendent level. Any other model suffers 1 or 2 Wounds respectively. Only Invulnerable Saves or Damage Mitigation rolls may be taken against these. Re-roll results of Crew Stunned and Explodes.
6	A Vehicle Unit Type that is part of the target unit suffers 1 Penetrating Hi, or 2 if Transcendent level. Any other model suffers 1 or 2 Wounds respectively. Only Invulnerable Saves or Damage Mitigation rolls may be taken against these.

Awakening Protocols (Bronze), Deep-Strike, Hyperspace Hunters , Living Metal , Reanimation Protocols Ethereal Interception: This unit is may perform as many additional Deep Strike Assaults as desired and does not have to take part in the initial assault. If this unit is in Deep Strike Reserve, immediately after an enemy unit arrives from Deep Strike Reserve this unit may choose to immediately arrive using the rules for Deep Strike (if this unit does not enter play in this manner, make Reserve Rolls for it as normal in subsequent turns). At the end of that enemy Movement phase, any friendly Deathmarks unit that arrived on the board in this manner during that turn may fire its weapons at any enemy unit that arrived from Reserves that phase; any Deathmarks unit that does so cannot fire its weapons in its following turn. Hyperspace Ambush: During the player turn in which this unit arrives from Deep Strike Reserve, all shooting attacks made by the Deathmarks in this unit will wound on To Wound rolls of 2+, regardless of the victim's Toughness.

Name	Range	Type	S	AP	Abilities
Fabricator Claw Array	—	Melee	User	5	—
Particle Beamer	24"	Heavy 1	6	5	Blast, Twin-Linked

Abilities

Fearless, **Living Metal**, **Reanimation Protocols**, **Soulless Hordes** (Silver)

Fabricator Claw Array: In each of your Shooting phases, instead of firing a weapon, a model with a fabricator claw array can choose to repair a single friendly vehicle that it is in base contact with. To repair a vehicle, roll a D6. If the result is a 4 or more, you may either restore a Hull Point lost earlier in the battle or repair a Weapon Destroyed or Immobilised result suffered earlier in the battle; this is effective immediately.

Nodal Relay: If a Canoptek Spyder is within **Nodal Range** of a model it will extend that range an additional 6" from the Spyder model, acting as a relay point.

Scarab Hive: Once per friendly Movement phase, each Canoptek Spyder can use this special rule to create Canoptek Scarabs. To do so, nominate a friendly unit of Canoptek Scarabs that is within 6" of the Canoptek Spyder. Add a single Canoptek Scarab base to the unit – this can take the unit beyond its starting size, but must be placed within 6" of the Canoptek Spyder. If a model cannot be placed for any reason, it is destroyed. Canoptek Scarabs created in this manner can move and act normally this turn. Roll a D6 each time a Canoptek Spyder uses its Scarab Hive special rule, immediately after placing any Canoptek Scarabs that were created – on a roll of a 1 the Canoptek Spyder suffers a single Wound with no saves of any kind allowed. In addition, for each unit of Spyders in the army, a unit of Canoptek Scarabs may be taken which do count towards the maximum number of units in their respective Force Organisation slot.

Add a number of Dynastic Warriors to the unit equal to the result – this cannot take the unit beyond its starting size nor, if it is currently embarked in the Ghost Ark, beyond the vehicle’s Transport Capacity (any excess are destroyed). These Dynastic Warriors must be placed within 6" of the Ghost Ark, or if the unit is currently embarked in the Ghost Ark, within it. If a model cannot be placed for any reason, it is destroyed. Allied Units

When selecting your units' Dynasties, Destroyer and Flayed One units count as being both Destroyer Cult and the selected Dynasty. Use the worst Level of Alliance between the two.

Phaeron's Undesirable Assets: Non-Headquarters Destroyer Cult and Flayed One units may be taken in the Primary Detachment Force Org Slots without requiring an entire Allied Detachment. They still impose Level of Alliance penalties regardless.

Level of Alliance

Dynastic Allies

The closest of allies who have fought beside each other many times. The two forces are considered 'friendly units' in all regards. This means, for example, that Dynastic Allies may be joined by allied Independent Characters, are treated as friendly units for the targeting of special abilities, Warlord Traits and so on.

Note: Not even Dynastic Allies can embark in allied Transport Vehicles, and rules that affect a particular force owing to its Dynasty special rule do not carry over to Dynastic Allies allied units.

Fellow Warriors

The two forces are willing to fight together for common cause against their foes. Units in your army treat other units at the Fellow Warriors level of Alliance as not being part of the army with the exception that they may not be deliberately targeted, attacked, targeted with special abilities, etc, (note that Blasts and the like may still scatter over allied forces and adversely affect them).

Fellow Warriors cannot benefit from the effects of allied Warlord Traits or be joined by allied Independent Characters, and are not counted as friendly units for the purposes of special abilities. In essence, the two forces fight alongside each other without any additional positive or negative effect.

Distrusted Allies

The two forces can make common cause against an enemy, but never fully trust each other due to a long-standing feud or inherent antipathy. Models in the allied detachment are treated exactly like Fellow Warriors except that units in this allied detachment are never counted as Scoring units and may not hold Objectives.

By the Phaeron's

The two forces will only ever fight beside each other in the direst of circumstances or by the direct command of their royal lord. The two forces are dealt with as Distrusted Allies but, in addition, whenever a unit is within 6" of a unit that is part of a Faction that falls under this level of alliance then both units reduce their Leadership by -1 until they are no longer within 6" of any unit from that Faction that is part of the same army.

Drawn to Blood: This model must start the game in Reserve or Infiltrate. Each time an enemy unit is completely destroyed the Necron player may move one unit of Flayed Ones with this unit attached from Reserve into Ongoing Reserve, even if this means that a unit will appear turn One.

Curse of Llandu’gor: This does not suffer the penalties for low Levels of Alliance (e.g. the Leadership penalty for *By the Phaeon’s*), although its allied units still do.

A Flayer King can take the **Tesseractarion Nemesor** ability if the prerequisites are met.
