Necron Rules

Special Rules

Annihilation Protocols

Only a single unit with Annihilation Protocol may be taken in armies using the Nodal Command Force Organisation Chart that contains any Fortifications.

Awakening Protocols (Tier)

This rule is accompanied by a tier of Bronze, Silver, Gold, and Platinum. Units with this rule can only be included in lists which contain an HQ model with the corresponding Nodal Command tier or higher. Some units have both of these special rules, in which case they cannot satisfy this rules requirements with their own Nodal Command special rule.

Command Protocols

At the start of the game, after both sides have deployed, each unit with this ability may select a Command Protocol that can be used during the game. Many options allow the player to roll a Command Protocol check for additional benefits. To do so, roll a Leadership Check, with success granting the listed effects. Failure causes the listed negative effect immediately.

Protocol of Eternal Guardian

This model may give up their Shooting Attacks this turn to use this power during the Movement Phase. Select a single friendly Necron unit within Nodal Range that has not moved yet and apply one of the following affects to the unit:

• The chosen unit gains a 5+ Cover Save, but may not Run, until your next turn

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed,

Protocol of Sudden Storm

This model may give up their Shooting Attacks this turn to use this power during the Movement Phase. Select a single friendly Necron unit within Nodal Range that has not moved yet and apply one of the following affects to the unit:

- The chosen unit may immediately move a number of inches up to twice its unmodified Initiative Characteristic. If the chosen unit has mixed Initiative Characteristics, use the highest unmodified Characteristics.
- The chosen unit ignores Difficult and Dangerous Terrain alongside negative modifiers to their movement until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit may only move half their Movement (rounded down) this turn.

Protocol of Vengeful Stars

This model may give up their Shooting Attacks this turn to use this power during the Shooting Phase. Select a single friendly Necron unit within Nodal Range that has not shot yet and apply one of the following affects to the unit:

- The chosen unit's Ranged Weapons gain the Ignores Cover rule until your next turn.
- The chosen unit's Ranged Weapons gain Breaching (6+) or increase the level of Breaching or Rending by 1 until your next turn.
- The chosen unit gains Relentless until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit suffers -1 BS this turn.

Protocol of the Hungry Void

This model may give up their Shooting Attacks this turn to use this power during the Shooting Phase. Select a single friendly Necron unit within Nodal Range apply one of the following affects to the unit:

- The chosen unit gains the Counter Charge (1) special rule until your next turn.
- The chosen unit's Melee Weapons gain Breaching (6+) or increase the level of Breaching or Rending by 1 until your next turn.
- The chosen unit gains the Furious Charge (1) special rule until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit suffers -1 WS this turn.

Protocol of the Undying Legions

This model may give up their Shooting Attacks this turn to use this power during the Shooting Phase. Select a single friendly Necron unit within Nodal Range and apply one of the following affects to the unit:

• The chosen unit can re-roll results of 1 once for Reanimation Protocols until next turn. Dynastic Warriors can re-rolls results of 1-2.

• The chosen unit's Living Metal ability has its It Will Not Die level increased by 2 levels (e.g. 5+ -> 3+) until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit suffers -1 to Reanimation Protocol rolls until next turn.

Protocol of the Conquering Tyrant

This model may give up their Shooting Attacks this turn to use this power during the Movement Phase. Select a single friendly Necron unit within Nodal Range and apply one of the following affects to the unit:

- The chosen unit counts as being in Nodal Range of all units with the Command Protocols special ability until your next turn.
- The chosen unit gains the Hit & Run ability until your next turn.

You may choose to make a Command Protocol check before using this power, if the check is successful two different options may be applied. If the Check is failed, the target unit gains the Soulless Hordes (Bronze) trait this turn, if it did not already have it, and cannot ignore the Engrammatic Attack Patterns provision this turn.

Nodal Command (Tier)

This rule is accompanied by a tier of Bronze, Silver, Gold, and Platinum. Each tier provides a specified range known as Nodal Range, which many other abilities reference for their effects. Any unit within Nodal Range of this unit may use its Leadership in place of its own and units with the Soulless Hordes sub-type may ignore the Engrammatic Attack Patterns provision. The highest tier unit in your army must be your Warlord.

| Tier | Nodal Range |
|----------|-------------|
| Bronze | 6" |
| Silver | 9" |
| Gold | 12" |
| Platinum | 12" |

Entropic Strike (X)

When allocating wounds from a Wound Pool from a weapon with this special rule, lower the target model's Armour Save by 1 (e.g. 3+->4+) permanently before making its save. Against Vehicles, an Armour Penetration roll equal to or greater than the listed value lowers the AV of all facings by 1 permanently before resolving the effects. Vehicles with lowered to an AV of 0 are destroyed and removed from the battlefield.

Exile Ray (X)

When firing a weapon with this special rule, a To Wound roll equal to or higher than the value listed wounds automatically, regardless of the target's Toughness, has the Instant Death special rule, and the victim must re-roll successful Invulnerable saves. Against Vehicles and Buildings, an Armour Penetration roll equal to or higher than the listed value inflicts a Penetrating Hit.

Gauss (X)

When firing a weapon with this special rule, a To Wound roll equal to or higher than the value listed wounds automatically, regardless of the target's Toughness. Against vehicles and buildings, an Armour Penetration roll equal to or higher than the value listed inflicts a Glancing hit. Super Heavy and Gargantuan Creatures are immune to this effect.

Hyperspace Hunters

A unit with this rule specializes in combat make use of movement through hyperspace pocket dimensions. In your Movement Phase, this unit may slip back into hyperspace instead of moving, as long as it did not arrive from Reserves this turn and is not locked in combat or Falling Back. If it does so, remove it from the board and place it into Ongoing Reserves. Models with this rule still make It Will Not Die rolls while placed back into reserves.

Decurion/Tesserarion Nemesor

The Decurion Nemesor / Tesserarion Nemesor special rule grants the following benefits:

- Rites of War: If a Detachment with the Necron Faction includes at least one model with the Decurion Nemesor special rule then that Detachment may select a single Rite of War.
- Lord of the Legion: An army may only include a maximum of one model with this special rule per 1,000 points. This counts across all Detachments of an army.

• A model with this special rule may also include an Immortals, Pariah Lychguard, or Royal Lychguard unit as part of the same Force Organisation slot as the model with the Decurion Nemesor special rule, but must still meet the required Awakening Protocols tier.

If multiple units are eligible to take this ability, it can only be taken by those with the highest Nodal Command tier in the force that has not already taken this ability.

Reanimation Protocols

Whenever a friendly unit with Reanimation Protocols suffers unsaved wounds or resolves an effect causing wounds, and casualties have been removed, total the number of wounds that have been lost among models that were destroyed and put them into a Reassembling Pool and a separate pool for wounds that have the Instant Death special rule.

For each wound in the Reassembling Pool, roll a D6, subtracting 1 for wounds in the Instant Death Reassembling Pool. This unit is Reanimating a wound for every 5+ roll. Each time such a unit Reanimates a wound, perform the following steps:

- If that unit is less than its Starting Strength, return one destroyed model to play in cohesion range with one wound remaining.
- Then, if that unit is at its Starting Strength and has models that are missing any wounds, select a model with the lowest remaining wounds; it regains one lost wound.

If the friendly unit is destroyed when Reanimation Protocols triggers, perform this process as normal, however after models have been returned from any successful **Reanimations**, resolve the remaining wounds in the triggering enemy unit's wound pool until it is empty; these remaining wounds can cause further Reanimation Protocols triggers.

When assigning wounds to units that have multiple models missing any wounds, assign them to the models with the least amount of wounds. In case of ties, the attacking player decides which models to apply them to.

Certain effects can cause models to immediately begin **Reassembling** or **Reanimating**; **Reassembling** models create a **Reassembling Pool** equal to the lost wounds of those model and then roll for them as normal. **Reanimating** models immediately follow the steps for **reanimating** a number of times equal to the wounds of the destroyed model.

Soulless Hordes (X)

Models with the Soulless Hordes subtype are subject to the Engrammatic Attack Patterns provision, which has effects dependent on the tier of the subtype:

Bronze: During the controlling player's Shooting phase and Charge sub-phase, the Soulless Hordes unit must attempt a Shooting Attack if there is an enemy unit within range (they are not forced to charge), and must target the closest enemy unit possible that is within its line of sight and a valid target for a Shooting Attack or Charge. If two or more targets are equally close then the controlling player chooses which will be the target of a Shooting Attack or Charge. Similar to the Fearless rule, this unit cannot choose to fail a Morale check due to the Our Weapons Are Useless special rule. Additionally, they may not make Reactions.

Silver: During the controlling player's Shooting phase and Charge sub-phase, if the unit attempts a Shooting Attack and/or Charge they must target the closest enemy unit possible that is within its line of sight and a valid target for a Shooting Attack or Charge. If two or more targets are equally close then the controlling player chooses which will be the target of a Shooting Attack or Charge. Similar to the Fearless rule, units with this subtype cannot use any Reactions that grant a Cover Save, Armour Save or Invulnerable Save, and cannot choose to fail a Morale check due to the Our Weapons Are Useless special rule.

The Command Protocols trait is able to suppress this sub-type's effects while in Nodal Range.

Teleporation Reserves

Tesla (X)

When firing a weapon with this special rule, a To Hit roll equal to or higher than the value listed generates an additional 2 hits. These hits may be applie to the target unit, or to any unit within 2" of the target unit.

Tomb Guardians

Only a single unit with the Tomb Guardians rule may be used in any army which is built using the Nodal Command Force Organisation Chart and does not contain any Fortifications, should the army contain Fortifications there is no limit.

Unit Subtypes

Living Metal

Models with the Living Metal subtypes gain a number of effects:

- Models with the Living Metal subtype have the It Will Not Die (5+) Special rule.
- Successful Wounds inflicted by attacks with the Poisoned or Fleshbane special rules must be re-rolled against models with the Living Metal subtype.
- The Shock Pulse and Disruption special rules affect models with the Living Metal subtype.
- Models with the Living Metal subtype ignore Leadership penalties caused by the Anethema sub-type.
- Models with the Living Metal subtype may not make Sweeping Advances, unless a rule specifies otherwise.
- Vehicles with the Living Metal subtype ignore the effects of Crew Shaken (but still lose a Hull Point).
- Heavy or Super-Heavy Vehicles with the Living metal subtype are not subject to the particular effects of the Lance and Melta special rules by attacks made against it and reduce the effects of all rolls on the Vehicle Damage chart caused by Penetrating hits (other than by Destroyer type weaponry) by -1.

Canoptek

Models with the Canoptek subtype gain the Fearless special rule.

Destroyer

Models with the Destroyer subtype gain a number of effects:

- All models gain the Preferred Enemy (Non-Necrons) special rule.
- All models gain the Hardwired for Destruction special rule, which grants: This unit is able to make Sweeping Advances.

Flayer

Models with the Flayer subtype gain a number of effects:

- All models gain the Hatred (Non-Necrons) special rule.
- All models gain the Fear (2) special rule.
- All models gain the Deep-Strike and Infiltrate special rule,
- All models gains the Flesh Hunters special rule, which grants: This unit is able to make Sweeping Advances.

Floating

A unit that includes only models with the Floating sub-type may ignore the effects of any and all terrain it passes over during movement, including passing over vertical terrain and Impassable Terrain without penalty or restriction. However, such units may not begin or end their movement in Impassable Terrain, and if beginning or ending their movement in Dangerous Terrain must take Dangerous Terrain tests as normal.

Noble

A model with the Noble sub-type gains the Independent Character special rule.

Necron Factions

Charnovokh

Advanced Reaction: Dynasty Effect:

Maynarkh

Maynarkh Dynasty Necron units gain the Necron Dynasty (Maynarkh) special rule, which grants the TODO: This advanced reaction and Cursed Awakening special rule, alongside providing access to certain pieces of wargear.

Advanced Reaction:

Necron Dynasty (Maynarkh) (Cursed Awakening): When a unit made up of entirely models with the Necron Dynasty (Maynarkh) special rule attacks during the Fight phase against an enemy unit that is Pinned, Falling Back, or outnubmered by the attack unit it gets a +1 to all To Wound or Armour Penetration rolls made during the Assault. Futhermore if one or more models with this special rule are part of a combat that results in a draw, then the side that includes one or more models at the end of the fight sub-phase with this special rule is counted as having won the combat by 1 point. If both sides include models with this special rule then the combat remains a draw. Models with the Decurion/Tesserarion Nemesor special ability may also take Charnel Lychguard as a part of the same Force Organization slot.

Mephrit

Mephrit Dynasty Necron units gain the Necron Dynasty (Mephrit) special rule, which grants the Solar Fury advanced reaction and Stellar Destruction special rule, alongside providing access to certain pieces of wargear.

Advanced Reaction (Solar Fury): This Advanced Reaction may be made once per battle during the opposing player's Shooting phase when any enemy unit declares a Shooting Attack targeting a friendly unit under the Reactive player's control composed entirely of models with the Necron Dynasty (Mephrit) special rule. Once the Active player has resolved all To Hit and To Wound rolls, and Armour Saves are made, but before any Damage Mitigation rolls are made or casualties removed, the Reactive player may make a Shooting Attack, targeting the unit that triggered this Reaction, with all weapons increasing their AP by 1 but gaining the Gets Hot special rule. To Hit rolls for weapons that already possess the Gets Hot special rule trigger that special rule on a roll of 1 or 2 during this Shooting Attack, instead of only on a 1. A unit that makes a Solar Fury as part of a Solar Fury Reaction may not make any attacks indirectly (without line of sight) including weapons with the Barrage special rule or other weapon or special rule that otherwise ignore line of sight, and Vehicles may only fire Defensive weapons. Template weapons used as part of a Solar Fury Reaction use the Wall of Death rule instead of firing normally.

Necron Dynasty (Mephrit) (Stellar Destructors): When a unit made up of entirely models with the Necron Dynasty (Mephrit) special rule rolls for scatter with a Blast Weapon they roll a D6 instead of 2D6.

Nephrekh

Advanced Reaction: Dynasty Effect:

Nihilakh

Advanced Reaction:
Dynasty Effect:

Novokh

Novokh Dynasty Necron units gain the Necron Dynasty (Novokh) special rule, which grants the Blood Engrams advanced reaction and Awakened By Murder special rule, alongside providing access to certain pieces of wargear.

Advanced Reaction (Blood Engrams): This Advanced Reaction may be made once per battle in the opposing player's turn, when any enemy unit with one or more models within 12" of a friendly unit made up entirely of models with the Legiones Astartes (Space Wolves) special rule is moved during the Movement phase. Once the enemy unit that triggered this Reaction has been moved, but before any other units are moved, a single friendly unit made up entirely of models with the Legiones Astartes (Space Wolves) special rule that can draw a line of sight to the enemy unit that moved may immediately move up to a number of inches equal to the highest Initiative Characteristic in the unit and then declare a Charge targeting the enemy unit that moved if it is within 12". A Charge declared as part of this Reaction is resolved immediately (the enemy unit may not declare any Reaction against this Charge), and if successful the combat will be fought as normal in the following Assault phase, with a Charging unit with the Legiones Astartes (Space Wolves) special rule gaining all the normal benefits of Charging.

Necron Dynasty (Novokh) (Awakened By Murder): In the Fight sub-phase, after casualties have been removed but before determining which side has won, if this unit has caused unsaved to the enemy unit it enters *Engrammatic Blood Rage* until the end of the game. When in *Engrammatic Blood Rage*, this unit gains the Fearless, Furious Charge (1), and Rage (1) special rules.

Bloodswarm Scarabs

Friendly units with the Flayer sub-type can re-roll the scatter dice when arriving from Deep Strike Reserve.

Dispersion Shield

Grants a 3+ Invulnerable Save, but the wielder never receives +1 Attack for fighting with two Melee weapons. In addition, if this save is made against a shooting attack, the bearer may take a -1 penalty to the Invulnerable Save to attempt to reflect the weapon into a nearby enemy. If the save is successful, choose an unengaged enemy unit within 6": that unit then suffers a single hit equivalent to the attack that was saved. This option may not be used on Blast or Template weapons. For the purpose of cover and other effects, treat the reflected shots as having come from the bearer's unit.

Flensing Scarabs _

X pts

During the first round of each close combat, this unit's weapons count as having the Shred special rule. Units with the Necron Dynasty (Maynarkh) special rule may also take this wargear.

The Ethereal Interception Advanced Reaction can be performed by this unit for 0 Reaction Allotment. Additionally, the may opt to re-roll Deep-Strike scatter rolls.

Mindshackle Scarabs

At the start of the Fight sub-phase, select a model in base contact with the bearer. The target must take a Leadership Check on 3D6. If the Check is failed, the victim strikes at his allies instead of attacking normally. During the Fight sub-phase, the target makes his attacks against his own unit (automatically hitting if they are the only model in the unit), resolved as normal with any abilities and penalties from his weapons (the controller of the Mindshackle Scarbs chooses which, if there is a choice). If the target is still alive, the victim returns to normal once all blows in that round of combat have been struck.

Phylactery

Increase the models It Will Not Die level to 3+.

Phase Shifter

The bearer can use the Tesseract Labyrinth in lieu of making a Shooting or Close Combat attack this round. Choose a unit within 6". The unit must immediately roll a Wounds Check for each model based on their current remaining wounds or be trapped within the Labyrinth while the Necron Character remains alive.

This can also be used to carry a unit alongside the bearer. Select a unit to start the game inside the Tesseract Labyrinth. They can be disembarked as if they were in a Transport with no Special Abilities following the relevant rules.

If paired with the Mindshackle Scarabs wargear, this can also be a unit chosen from an enemy faction. The unit is treated as a Distrusted Ally and still take up a relevent Force Org Slot. In narrative games, units that are captured at the end of the game can be included as well. Leave it your opponents as to whether it includes a Force Org Slot or points.

However, they cannot end their move on top of other models and can only end their move on top of impassable terrain if it is possible to actually place the models on top of it.

Quantum Shielding

A vehicle equipped with active quantum shielding counts all of its Front and Side Armour Values as 13. A vehicle's quantum shielding is active until it suffers a penetrating hit, at which point it immediately deactivates. For the remainder of the battle after a vehicle's quantum shielding deactivates, all subsequent hits against that vehicle (including hits made from subsequent shooting attacks in the same phase – either from a different weapon or a different unit – or hits made at a lower Initiative step in close combat) are treated as though the vehicle was not equipped with quantum shielding.

The unit suffers a number of Wounds, dependent on the level of the C'Tan. Shard level causes wounds equal to 3D6 minus the target's Leadership while Transcendent causes 4D6. If carried by a non-vehicle model, the model is removed from play as a casualty with no saves. If mounted on a vehicle, it counts as Weapon Destroyed and causes the lose of a Hull Point. In either case, the shot(s) misfire and are lost.

The reacting unit immediately arrives from Reserves, following the rules for Deep Strike Assaults. Then, if it within Line of Sight of the triggering unit, it may make a Shooting attack against the triggering unit. This reaction may only be used once per turn for each unit with it.

Strategical Timewaeaver

When an opponent declares a Shooting Attack or Fights this unit or a unit it is attached to, this reaction may be declared. The triggering unit must re-roll all successful To Hit and To Wound rolls against the reacting unit until the end of the attack, keeping the second result. This re-roll occurs even if the triggering unit's rules (e.g. Shred, Hatred, etc.) have already re-rolled these dice. This reaction may only be used once per game, per unit.

Royal Guard: Only a single unit of Lychguard may be purchased for each Lord, Nemesor Lord, Nemesor Overlord, and/or Phaeron and are treated as their personal retinue. They take up a single Force Organisation chart choice with that Character, but do not have to be deployed with them and are treated as a separate unit during the game. In addition they count as within Nodal Command Range of their respective HQ while they are both on the table.

Royal Shock Troops: If this unit does not contain any models with the Noble sub-type in it, the unit is allowed to make Sweeping Advances.

Enthralled Protector: If a unit contains a Canoptek Cryptothrall model as well as one or more Crypteks or Cryptek Lords, any Wounds which would be allocated to the Crypteks or Cryptek Lords (even those caused by the Precision Strikes (X) or Sniper special rules) may instead be allocated to a Canoptek Cryptothrall first.

For each Cryptek or Cryptek Lord in your army, a Canoptek Plasmacyte Accelerator or Canoptek Plasmacyte Reanimator can be taken without taking up a Force Org slot. This unit starts the game attached to those units.

Evasion Protocols: This unit is able to join other units as if it had the Independent Character special rule.

Infused Madness (Destructor Only): Once per turn at the start of the Assault Phase, all other models with the Destroyer sub-type in the Plasmacyte's unit may gain the Furious Charge (1) and Rage (1) special rules until the end of the turn. If you do so, roll a D6: on a 5+, the unit suffers an immediate Wound, which only Invulnerable Saves and Damage Mitigation rolls can prevent.

Acceleration Logis (Accelerator Only): Once per turn, when the Plasmacyte's unit is called to make a Leadership test, you may have the unit re-roll the check. If you do so, roll a D6: on a 5+, the unit suffers an immediate Wound, which only Invulnerable Saves and Damage Mitigation rolls can prevent.

Reanimation Beam (Reanimator Only): Once per turn, when the Plasmacyte's unit is called to make a Reanimation Protocols check, you may add a +1 to the reanimate rolls. If you do so, roll a D6: on a 4+, the unit suffers an immediate Wound, which only Invulnerable Saves and Damage Mitigation rolls can prevent. Fabricator Claw Array: In each of your Shooting phases, instead of firing a weapon, a model with a fabricator claw array can choose to repair a single friendly vehicle that it is in base contact with. To repair a vehicle, roll a D6. If the result is a 4 or more, you may either restore a Hull Point lost earlier in the battle or repair a Weapon Destroyed or Immobilised result suffered earlier in the battle; this is effective immediately.

Nodal Relay: If a Canoptek Spyder is within Nodal Range of a model it will extend that range an additional 6" from the Spyder model, acting as a relay point.

Scarab Hive: Once per friendly Movement phase, each Canoptek Spyder can use this special rule to create Canoptek Scarabs. To do so, nominate a friendly unit of Canoptek Scarabs that is within 6" of the Canoptek Spyder. Add a single Canoptek Scarab base to the unit – this can take the unit beyond its starting size, but must be placed within 6" of the Canoptek Spyder. If a model cannot be placed for any reason, it is destroyed. Canoptek Scarabs created in this manner can move and act normally this turn. Roll a D6 each time a Canoptek Spyder uses its Scarab Hive special rule, immediately after placing any Canoptek Scarabs that were created – on a roll of a 1 the Canoptek Spyder suffers a single Wound with no saves of any kind allowed. In addition, for each unit of Spyders in the army, a unit of Canoptek Scarabs may be taken which do count towards the maximum number of units in their respective Force Organisation slot.

Repair Barge: At the start of each friendly Movement phase, this model can repair fallen Dynastic Warriors. To do so, nominate a friendly unit of Dynastic Warriors that is either within 6" of this model or embarked upon it, and roll a D3 and reanimate that may times; if embarked, this cannot return models above the Transport Capacity. These Dynastic Warriors must be placed within 6" of the Ghost Ark, or if the unit is currently embarked in the Ghost Ark, within it. If a model cannot be placed for any reason, it is destroyed. Dynastic Warriors repaired in this manner can move and act

If a unit disembarks from a Night Scythe after it has moved 24" or more, models in the unit can only fire Snap Shots until the start of their next turn. Units embarked on a Night Scythe ignore all effects of damage on passengers. If a Night Scythe is destroyed, the units embarked upon it suffer no damage or ill effects – instead they are immediately placed into Teleportation Reserve.

Allied Units

When selecting your units' Dynasties, Destroyer and Flayed One units count as being both Destroyer Cult and the selected Dynasty. Use the worst Level of Alliance between the two.

Phaeron's Undesirable Assets: Non-Headquarters Destroyer Cult and Flayed One units may be taken in the Primary Detachment Force Org Slots without requiring an entire Allied Detachment. They still impose Level of Alliance penalties regardless.

Level of Alliance

Dynastic Allies

The closest of allies who have fought beside each other many times. The two forces are considered 'friendly units' in all regards. This means, for example, that Dynastic Allies may be joined by allied Independent Characters, are treated as friendly units for the targeting of special abilities, Warlord Traits and so on.

Note: Not even Dynastic Allies can embark in allied Transport Vehicles, and rules that affect a particular force owing to its Dynasty special rule do not carry over to Dynastic Allies allied units.

2 Fellow Warriors

The two forces are willing to fight together for common cause against their foes. Units in your army treat other units at the Fellow Warriors level of Alliance as not being part of the army with the exception that they may not be deliberately targeted, attacked, targeted with special abilities, etc, (note that Blasts and the like may still scatter over allied forces and adversely affect them).

Fellow Warriors cannot benefit from the effects of allied Warlord Traits or be joined by allied Independent Characters, and are not counted as friendly units for the purposes of special abilities. In essence, the two forces fight alongside each other without any additional positive or negative effect.

Distrusted Allies

The two forces can make common cause against an enemy, but never fully trust each other due to a long-standing feud or inherent antipathy. Models in the allied detachment are treated exactly like Fellow Warriors except that units in this allied detachment are never counted as Scoring units and may not hold Objectives.

By the Phaeron's

The two forces will only ever fight beside each other in the direct of circumstances or by the direct command of their royal lord. The two forces are dealt with as Distrusted Allies but, in addition, whenever a unit is within 6" of a unit that is part of a Faction that falls under this level of alliance then both units reduce their Leadership by -1 until they are no longer within 6" of any unit from that Faction that is part of the same army.

Drawn to Blood: This model must start the game in Reserve or Infiltrate. Each time an enemy unit is completely destroyed the Necron player may move one unit of Flayed Ones with this unit attached from Reserve into Ongoing Reserve, even if this means that a unit will appear turn One.

Curse of Llandu'gor: This does not suffer the penalties for low Levels of Alliance (e.g. the Leadership penalty for By the Phaeron's), although its allied units still do.

A Flayer King can take the Tesserarion Nemesor ability if the prerequisites are met.

Mark of the Flayer: If this model's unit destroys an enemy unit during the Assault Phase or fails a Morale check, immediately roll a D6 and apply the result as determined below:

| D6 | Result |
|-----|---|
| | Berserk: The Flayer King is seized by murderous fury and unable to tell friend from foe. If part of |
| 1 | an infantry unit, resolve D3 automatic hits on that unit using the Flayer King's weapons. If alone, the |
| | Flayer King suffers an immediate Wound, with no save allowed. |
| 2-5 | In Control: The Flayer King is able to control their madness by sheer force of will, giving no effect. |
| | Transfiguration: The overlord is transfigured by madness, their auto-repair system distorting their |
| 6 | form to express the malignance that consumes them. They gains the Fearless and Rage (1) trait until |
| | the end of combat. |
